

REAL ESTATE, BS

Overview

The Bachelor of Science in Real Estate is a comprehensive program that teaches the traditional core concepts of real estate including real estate finance and project management, while integrating unique offerings including design and related environmental concerns. Traditional career paths include real estate investment and financial analysis, project design and development, asset and portfolio management, and urban planning and policy.

The BSRE curriculum is intended for all undergraduate students seeking to pursue careers in real estate, including double majors in architecture, business, environmental studies, and other liberal arts degrees.

- Faculty of Industry Professionals: Learn from current practitioners who bring real-world experience and a commitment to teaching
- Entrepreneurial Opportunities: The unique Design + Development Studio involves practical skill-building while working on real-world real estate proposals
- Research & Analysis: Students and faculty engage in industry research to advance the field
- Global Relevance: Coursework focuses on local examples of key national and global issues, such as river and water management, historic and cultural preservation, community health and engagement, and transportation and regional growth

Requirements

Course ID	Title	Credits
Core Requirements
