Employers in all industries urgently need graduates who can translate vast amounts of complex data into manageable intelligence in order to guide business decisions. Tulane’s Master of Business Analytics (MANA) program provides the rigorous, quantitative training students need to break into this sought-after field. This 36 credit-hour program can be completed in 11 months.

Learning from the Freeman School’s distinguished faculty members (http://business.tulane.edu/faculty-research/faculty-listings-specialization.php?specialization=analytics), students will be grounded in the practical application of business analytics through a curriculum (https://freeman.tulane.edu/programs/graduate/master-business-analytics/curriculum) co-designed by industry partners. Students will learn how to make informed, data-driven decisions, guided by the knowledge gleaned from big data, by analyzing real data sets and working with industry partners.

**Requirements**

The Master of Business Analytics (MANA) curriculum starts in July and consists of a summer boot camp, fall, and spring semesters.
