

## BIOLOGY (BIOL)

---

**BIOL 2220 Microbiology for the Healthcare Professional (4)**

This introductory microbiology course is designed specifically for students pursuing allied healthcare careers. The course provides a foundational understanding of microbiology, emphasizing the relevance of microorganisms to healthcare settings. Through virtual labs and interactive modules, students will explore the basic principles of microbiology, gaining insights into the role of microorganisms in health and disease. This course does not fulfill a major requirement for Cell & Molecular Biology or Ecology & Evolutionary Biology.

**Corequisite(s):** BIOL 2221.

**BIOL 2221 Microbiology for the Healthcare Professional Laboratory (0)**

Laboratory for BIOL 2220 introductory microbiology course designed specifically for students pursuing allied healthcare careers.

**Corequisite(s):** BIOL 2220.

**BIOL 4200 MCAT Review (0)**

The Medical College Admission Test (MCAT) review course prepares students for the MCAT, including developing test-taking strategies, familiarizing students with the test's format and structure, and reviewing subject content covered by the test. This is a non-credit course and is not graded. The course does not count toward any degree requirements.

**BIOL 5380 Junior Year Abroad (1-20)**

**Maximum Hours:** 99
