

## MD - GENETICS (GENE)

---

### **GENE 1007 Genetics (1)**

The Genetics course is designed to provide an overview of human genetic concepts and clinical disorders that have a genetic component. The course seeks to teach students to apply knowledge of the principles of human genetics to a variety of clinical problems. It surveys many clinical areas including cytogenetics, molecular genetics, biochemical genetics, population genetics and clinical genetics.

### **GENE 5500 Clinical Preceptorship (1)**

Preceptorships are available to T1 & T2 students who are interested in the specialty. Students must identify a physician to shadow. Students must have their preceptorship approved in advance by the Senior Associate Dean of Admissions and Student Affairs.

### **GENE 5540 Genetics Research (1)**

5000-level research opportunities are available to T1 & T2 students who are interested in the specialty. Students must identify a faculty member with whom to conduct research. Students must have their research prospectus form approved in advance by the Senior Associate Dean of Admissions and Student Affairs.
