TIDES - RESIDENTIAL LEARNING COMMUNITIES (TIDR)

TIDR 1014 Cultivate Residence Self Care (1)
Health in college is so much more than avoiding pizza every night and occasionally going to the gym. Health is multifaceted and is pivotal to your ability to thrive during the next four years. This course will examine the most relevant health topics for college students from a public health perspective, integrating theories and practices relevant to your life. In addition, this course seeks to cultivate leadership skills as an element of being healthy and successful in college.

TIDR 1015 Cultivate Inner Changemaker (1)
Cultivate your Inner Changemaker is devoted to exploring the skills, strategies, and ideas of effective social change advocates in the 21st century. Students will be learning about some of the essential skills of effective changemakers, including leadership, optimism, resilience, risk-taking, luck, relationship building, conflict resolution, creativity, and innovation. Throughout the course, students will practice these skills, both in class and through assignments.

Corequisite(s): TIDR 1890.

TIDR 1018 Case Studies in Leadership (1)
This 1-credit course will utilize a variety of cases which highlight a real-life example of a challenge in leadership. Fields covered will include business, politics, non-profit work, and social movements - all highlighting decision making in New Orleans following Hurricane Katrina. In most class periods, you will be asked to "inhabit" the case and take up the dilemma of its protagonist. I may assign class members roles to prepare and play in the class discussion spontaneously or in advance. None of the cases have right answers, although we may have an epilogue that tells what actually happened (the historical outcome). You are asked to wrestle with the problem as if it were your own and bring your experience and classroom learning from Tulane University and elsewhere to bear on the questions. The Harvard Business School originated and developed the phenomenon of the teaching case to simulate business experience in novices, to create a concrete vehicle for applying abstract theories to real-world situations, and to engender engaged classroom discussion while fostering critical thinking skills as students were forced to wrestle with actual business dilemmas that had no easy answer. It is no accident that professional schools were drawn to case teaching—Law, for obvious reasons—but also schools of public affairs and public health whose missions are to utilize the best thinking of the disciplines to prepare students for careers as practitioners. Cases marry learning about real world policy and organizational problems with critical thinking, abstract reasoning, and theorizing valued in all academic disciplines. In particular, this course will offer you a chance to get to know New Orleans as a resilient city with monumental challenges left to tackle.

TIDR 1090 Who Dat, Fan Up & Geaux (1)
Founded in 1718, the city of New Orleans has a long and rich history with sports. From the rise of social class-driven sports such as rowing and billiards to the New Orleans Saints’ heroic revival of the city post-Hurricane Katrina, sports has been as integral to the area as food, music, and Mardi Gras. Sports have made an enduring impact on the social world in which we all live. It is a taken for granted aspect of our everyday lives – whether that entails watching “Sportscenter” or noticing that every single major newspaper contains a “Sports” section that is as long if not longer than any other section. Yet there is more to sport than just what we see on a daily basis. In this course, we will explore general sports-related topics and examine actual case studies related to New Orleans’ sports scene. More than simply ‘talking sports,’ students will study issues from political, economic and social viewpoints and also gain an understanding of the rich sports heritage found here in New Orleans. Readings and discussions, field trips, and guest speakers will aid students to understand both historical accounts and modern-day subjects associated with sports such as governmental involvement, public financing, and community development. Students will participate in a mandatory service learning component with TBD. Their after-school programs promote development in boys and girls through activities that build character, cultivate new skills, and create a sense of belonging – in this case a place where kids can express themselves, play together and get fit. By participating in activities with NFL Youth Education Town students will deepen their understanding of the political, economic, and social ramifications of sports on a local level by making correlations to sports and its impacts on the city’s youth, infrastructure, civic pride, crime reduction efforts, poverty eradication, and other areas, and gain an awareness of their role as a citizen in the city of New Orleans.

TIDR 1117 N. O. Performance Culture (1)
There will be two primary goals in this course. The first will involve introducing students to New Orleans's history, culture, and literature. The second will entail an interdisciplinary introduction to a wide array of influences with the effort of showing how New Orleans's turbulent history of changing possession, immigration, and migration have contributed to a “performance” of various versions of “New Orleansness.” The course will focus specifically on the presence of French, Spanish, African, and a brief overview of the various immigrant communities in the city's history and the various ways in which these groups have performed their own version of New Orleans for the city itself, the United States, and the world. In addition, the students will use the maps found in Unfathomable City: A New Orleans Atlas to look at how maps are constructions of authenticity.

TIDR 1225 Women in STEM (1)
This course covers the challenges facing women pursuing degrees and careers in STEM. Many of these challenges are institutionalized barriers that still exist, creating a system in which it is harder for women to thrive in comparison with their male peers. Other minority groups in STEM face many of the same challenges as women, and the additional and different barriers for other underrepresented groups will also be discussed. The course will cover strategies for success in STEM and becoming an ally and advocate for other traditionally marginalized groups in STEM.
TIDR 1265 Indian Tribes on the Bayou (1)
Want to explore the wilds of Louisiana outside of New Orleans? Try some alligator meat, shrimp caught fresh from the sea or, in general, explore another side of Louisiana’s rich cultural heritage- then this class is for you! The far-reaching impact of Native American Tribes of the lower Mississippi Valley on shaping Louisiana history is among the least explored subjects among the otherwise well-documented rich history of Louisiana. Recent and ongoing research shows that without the “Petit Nations”, as some of the Tribes were called, the history of this region would have been quite different. This course offers students the rare opportunity to participate in on-going, important research that entails working directly with Tribal members. In addition, students will have the opportunity to take a trip conducted by Tribal members down the bayous as they give a tour of their ancestral lands as well as explore other areas of Louisiana outside of New Orleans while also tasting some of the food native to Louisiana. An experience not to be missed!

TIDR 1317 Sports as a Leadership Model (1)
This course uses a sports lens to introduce Tulane students to what character traits have made sports figures, coaches, teams, and organizations successful as well as aided in turning sports from recreational fun to a multi-billion-dollar global industry juggernaut. This class will introduce students to several different valuable life skills and lessons to aid them in their academic endeavors and professional journey. The goal of this class is to see what transferable skills those in the world of sports use in their respective venues to help them become success stories and pass those qualities along to you to aid you in achieving success in life during and after Tulane.

TIDR 1415 FEMtech: Gender and Technology (1)
Since the industrial era, analog, digital, and medical products have been produced with the claim that certain technologies make women’s lives easier. This course examines the role that FEMtech plays in women’s lives and the role that product design plays in shaping discourse around women’s relationship with technology. Students will also explore the recent rise of the FEMtech app technology, a projected $120 billion-dollar industry. Students will have the opportunity to learn about the technology and start-up industries from technology leaders in New Orleans. Students will use feminist technology design strategies to design and pitch a FEMtech product.

TIDR 1890 Service Learning (1)
Service learning co-requisite for TIDR courses.

Maximum Hours: 99

TIDR 1983 Us vs. Them (1)
Black vs. White. Citizen vs. Immigrant. Transgender vs. Cisgender. Christian vs. Muslim. Gay vs. Straight. The list goes on. In recent years, the United States has become increasingly polarized. The most interesting and exciting aspects of human diversity are set against one another, in rigid opposing binaries. Through interactive workshops, cultural trips, discussions of texts and films, writing reflections, and guest speakers, this seminar will serve as an incubator for students from diverse backgrounds to develop their understanding of the complexities of cultures, identities, and power dynamics. We will simultaneously explore everyday practices for world building beyond “Us. Vs. Them.”

TIDR 1985 Women Leading New Orleans (1)
From non-profit organizations to government, from social movements to Mardi Gras, from restaurants to boardrooms, women have led New Orleans. Using an intersectional feminist lens, this course will explore how the personal, the organizational, and the institutional intersect to shape how women practice leadership. Students will be introduced to theories and research that address gender and leadership while focusing on historical and contemporary examples of women practicing leadership in New Orleans. The course will begin with a brief introduction to a sociological perspective on gender and intersectionality - foundational concepts of the course - and move into discussions of how and why women lead, as well as barriers they encounter to leadership. Guest speakers, field trips, and writing assignments will ask students to think broadly, but also analytically, about what leadership means, as well as about how identities and institutions shape the experience of leadership.
