

# BIOMEDICAL SCIENCES, PHD WITH BIOMEDICAL INFORMATICS CONCENTRATION

## Overview

The Division of Biomedical Informatics and Genomics offers a PhD track in Biomedical Informatics (BIMI) within the Biomedical Sciences (BMS) Graduate Program. This program offers a research-based graduate training that prepares students to perform as leaders in the biomedical informatics, where they may apply their knowledge in academia, clinical healthcare, public health, and other industries. Students are admitted to the BIMI Track upon admission to the BMS PhD program, and will complete a curriculum focused on biomedical health informatics, data science, and other courses in molecular biology.

## Requirements

A minimum of 48 credit hours of course work and independent study is required for the Ph.D. with a Concentration in Biomedical Informatics. In the first year, students in the Biomedical Informatics (BIMI) Track take an identical curriculum, totaling 28 credit hours. In the second year, students complete core coursework, electives, and Directed Independent Study, for a minimum of 20 credit hours.
