Clinic and Translational Research Certificate (Graduate)

Overview
The Certificate in Clinical and Translational Research provides epidemiology and biostatistics students with an in-depth exploration of epidemiologic methods within the context of clinical research. Students will learn clinical research methods, clinical trials, and meta-analysis. The program will be useful both to those with a clinical background and to those without prior clinical training. Students will learn to refine their critical thinking skills and apply epidemiologic methods to clinical research.

Offered by: Department of Epidemiology

Faculty Lead: Lydia Bazzano, MD, PhD (https://sph.tulane.edu/epid/lydia-bazzano/)

Clinical & Translational Research Certificate Enrollment Form (https://tulane.box.com/v/epid-transresearch-cert-enroll/)

Purpose
This certificate is designed to prepare students for research readiness in conducting clinical and translational research. This certificate will also prepare students to be collaborators on clinical research projects and apply research skills in clinical practice.

Eligible Students
This certificate program is designed for advanced students currently in an MPH/MSPH/MPH&TM/MHA program. Students must have a background in epidemiology or biostatistics.

Certificate Competencies
Students who earn the Certificate in Clinical & Translational Research will be able to:

• Critically assess medical literature;
• Describe issues related to clinical research design, including statistical power calculations; and
• Evaluate methodological issues in clinical research, clinical trials, and meta-analysis

Number of Credits Required for Completion: 14

Requirements
Certificate in Clinical and Translational Research

The Certificate in Clinical and Translational Research requires 14 credits:
