Preparation Physician Leaders for Consumer-Driven Healthcare
The Graduate Certificate in Physician Leadership prepares physicians to lead complex, integrated healthcare delivery systems. The program equips students with qualitative and evidence-based management and leadership skills. Courses carry graduate degree credit and may be applied towards a master’s degree.

Participants proceed through the certificate requirements in an executive style cohort with monthly on-site sessions with intervening distance and worksite experiential activities, supplemented with visiting scholar and leaders’ conferences. Sessions are facilitated by recognized experts with demonstrated teaching skills, knowledge and “real world” experience, and are supported by a team coordination and project management software.

Admission: Prospective student must have:
- Medical degree (MD, DO or equivalent; an official transcript is required)
- Minimum of three years of professional experience
- A statement of purpose and program fit

Program Competencies
