TROPICAL MEDICINE, PHD

The PhD program in Tropical Medicine is an advanced degree that prepares students to pursue careers in tropical medicine. The PhD graduate is expected to have knowledge across a wide range of tropical diseases as well as sustained experience in the conduct of research in one or more content areas. Graduates of the PhD program pursue careers in basic and applied research in academic institutions, governmental agencies, industry and nonprofit organizations.

Program Competencies (https://sph.tulane.edu/trmd/phd)
• Demonstrate proficiency in an core area of expertise/research specialization
• Demonstrate proficiency in the design and conduct of studies and protocol development
• Analyze collected data using appropriate techniques
• Communicate original research methods and results to peer groups, students, practitioners/industry, and the general public
• Synthesize results and knowledge to address unanswered questions to public health problems

Requirements
The PhD program requires a minimum of 72 post baccalaureate degree credits, with at least 30 credits of advanced courses work taken at SPHTM. Up to 42 credits may be applied from a MPH or other master's degree. The master's courses are reviewed and only courses fulfilling the required competencies may be applied toward the 72 credits for the PhD. Prerequisite or equivalent courses will not count in the 30 credits of advanced study, but may count toward the total 72 credits. The advisor works with the students in identifying the course of study in the doctoral program.

| Advanced Methods
  SPHL 8500 | Interdisciplinary Doctoral Sem       | 1       |
  BIOS 6040 | Intermediate Biostat                 | 3       |
  EPID 7120 | Epidemiologic Methods II             | 3       |
| Advanced Topics in Tropical Medicine
  TRMD 7180 | Immunoparasitology                   | 2       |
  or TRMD 7800 | Adv Medical Entomology              |         |
  TRMD 7820 | Malaria                              | 2       |
  or TRMD 7420 | Pop Bsed Malaria Prev and Ctrl     |         |
  TRMD 8990 | Doctoral Independent Study           | 1-3     |

Advanced electives or independent studies to obtain a total of 30 credits of advanced study

1 In conjunction with a laboratory rotation (TRMD 8100 Laboratory Rotation (2 c.h.))

Comprehensive Exam
Students are required to pass a written comprehensive examination that demonstrates general knowledge of Tropical Medicine and research applications. The department administers a written comprehensive examination upon completion of the required coursework. Candidates must successfully complete the comprehensive exam requirement to move on to dissertation research.
Doctoral Committee
(See PhD Handbook (https://sph.tulane.edu/doctoral-students))

After successful completion of the comprehensive examination, the student forms a dissertation committee and develops a prospectus. The committee must include a minimum of three members with at least two faculty from the Department of Tropical Medicine and one external to the school.

Prospectus
(See PhD Handbook (https://sph.tulane.edu/doctoral-students))

Students work with their advisor and doctoral committee to determine a research hypothesis and prepare a prospectus of proposed dissertation research. The research prospectus is presented and defended at least one semester before the dissertation defense. Following the successful defense of the prospectus, students are admitted to PhD candidacy and proceed with dissertation research.

Dissertation
(See PhD Handbook (https://sph.tulane.edu/doctoral-students))

Students must conduct original research and defend a dissertation based on that research. The dissertation research demonstrates scholarly work and is the basis for the dissertation. The student defends the dissertation to their committee; the dissertation committee and SPHTM Executive Faculty approve the dissertation.
